kevin k. linn
323 seattle court
richland, washington 99352

(509) 375-0465
(509) 376-3519 (work)

education

eastern washington university
cheney, washington 99004-2447
(509) 359-2397

bachelor of science
computer information systems
december, 1988

work experience: present position

lockheed martin information technology
senior software engineer
december, 2000 to present
supervisor: vicki j. myer, (509) 376-3643

duties and responsibilities include defining and
analyzing customer requirements, systems
design, developing, testing and reviewing code,
following established software engineering
practices (configuration management, change
control, testing, etc.) and preparing written and
oral presentations.

skills include analyzing the business needs and
processes of the hanford project customers
and developing web-based solutions to
enhance and streamline their efforts.

recent application development efforts include
designing, developing and implementing a new
content management system for the
www.hanford.gov websites. this effort replaced
a very large, static site and transformed it into a
database-driven application.

all of the applications developed at hanford
have been written on the macromedia
coldfusion mx environment with a microsoft sql
server and oracle backend database.

work experience: 1999 to 2000

washington state
administrative office of the courts
internet webmaster
december 1999 to december 2000
supervisor: tom clarke, (360) 705-5304

duties and responsibilities included redesigning
the internet presence for the washington state
courts, maintaining and updating information
on the internet, extranet and intranet web sites
for the administrative office of the courts

skills included analyzing the needs of the
courts system customers to provide a one-stop
location for court information. the main goal of
this effort was to allow the citizens of
washington state to become familiar with and
take advantage of the information and services
provided by the court system.

www.courts.wa.gov was built using
macromedia coldfusion 5.0 and microsoft sql
server 7.0.

work experience: 1997 to 1999

washington state
legislative service center
analyst/programmer
september, 1997 to december, 1999
supervisor: ronda tentarelli, (253) 964-8993

duties and responsibilities included scheduling and coordinating help desk services and providing over-the-phone computer support to the washington state legislature. other duties included programming several support applications for maintaining the help desk as well as the legislative internet and intranet presence.

skills included scheduling and coordinating staff for the help desk and coordinating an effort to procure a commercial-off-the-shelf call tracking system.

while performing duties as a help desk lead and application programmer i created a help desk staffing program using microsft access and visual basic for applications. i also created several web-based applications using macromedia coldfusion 5.0 and microsoft sql server 7.0 including a web-based front end to the call tracking system, online phone directory, and the district finder which aids citizens in finding their voting district and associated state representation.

work experience: 1995 to 1997

lockheed martin services, inc.
boeing computer services, inc.
software engineer
march 1995 to september 1997
supervisor: rick grandy, (509) 376-7967

duties and responsibilities included researching, analyzing and developing computer applications and new technology that could run over the internet and corporate intranet.

skills included analyzing the business needs of the hanford site contractors and develop ways to enhance and streamline their effort using the intranet and internet.

the applications built during this time included an online phone and electronic mail directory and a course tracking system for the human resources department of the department of energy's local office. all applications were developed using microsoft active server pages, c++ and sql server.

work experience: 1989 to 1995

boeing computer services, inc.
systems analyst
march 1989 to march 1995

duties and responsibilities included in-person and over-the-phone computer application support.
